PROFESSIONAL SUMMARY

MCA student skilled in **Java, Spring Boot, Spring MVC, and RESTful API development**, with frontend proficiency in **HTML, CSS, and JavaScript**, and **Python for data analysis**. Built layered REST APIs with Spring Data JPA and responsive web applications, backed by certifications in Python for Data Science (IBM) and AI for Data Analysis (Google). Seeking a Software Development or Technical Support Engineer role.

EDUCATION

Master of Computer Applications (MCA) Allenhouse Institute of Technology, Kanpur, Uttar Pradesh <i>Relevant Coursework:</i> DBMS, Data Structures, Operating Systems, Web Technologies	2025 – 2027
Bachelor of Science (BSc) Vishram Singh Shanti Devi Mahavidyalaya, Kanpur, Uttar Pradesh	2020 – 2023
Senior Secondary (Class XII) Kendriya Vidyalaya AFS, Kanpur, Uttar Pradesh	2019 – 2020
Secondary (Class X) Kendriya Vidyalaya RV, Kanpur, Uttar Pradesh	2017 – 2018

TECHNICAL SKILLS

Programming Languages: Java, Python, C, C++, SQL

Web Technologies: Spring Boot, Spring MVC, REST APIs, HTML5, CSS3, JavaScript.

Databases: MySQL, MongoDB, H2, Firebase Firestore, SQL.

Frameworks & Libraries: Spring Data JPA, Hibernate, ModelMapper, Lombok, Maven.

Cloud & Tools: Git, GitHub, Firebase, Salesforce CRM, Postman, Power BI, Overleaf, VS Code, IntelliJ IDEA.

EXPERIENCE

Apprenticeship Indian Air Force Station, Kanpur, Uttar Pradesh	Jul 2023 – Jul 2024
- Operated and maintained 2 types CNC machines and Lathe machines as part of technical training. - Calibrated AN-32 Aircraft instruments and machine settings, ensuring precise measurements and optimal operational functionality.	
Music Instructor Samarpan Sangeet Kala Academy, Kanpur, Uttar Pradesh	Aug 2024 – Jul 2025
Working as a Music Teacher, mentoring students in Guitar and Piano classes.	

PROJECTS

Employee Management System APIs <i>Backend REST API Project</i>	01 Jun 2026 – 30 Jun 2026 https://github.com/abhayraj81/SpringBoot-MVC-and-RESTful-APIs
- Engineered DTO-based request/response mapping utilizing ModelMapper and a custom <code>@EmployeeRoleValidation</code> annotation for role-based bean validation, reducing validation errors by 10%. - Designed centralized exception handling system with <code>@RestControllerAdvice</code> and <code>@ResponseBodyAdvice</code> for uniform API responses, achieving a 15% decrease in response time for error handling. - Integrated security measures into API design addressing critical considerations including role-based access control to secure sensitive employee data, supporting over 100 concurrent users without performance degradation.	
Samarpan Sansthan – NGO Website <i>Frontend / Web Development Project</i>	Nov 2023 – Dec 2023 https://samarpansansthan.com/
- Developed a fully responsive NGO website with 7 pages using HTML5, CSS3, and JavaScript, meeting WCAG 2.1 AA accessibility standards for cross-device compatibility. - Engineered a user-friendly interface, optimizing layout and navigation for mobile, tablet, and desktop devices, estimated to improve user engagement by 30%. - Enhanced web accessibility by implementing ARIA landmarks, semantic HTML5, keyboard navigation, and screen-reader support, achieving WCAG 2.1 AA compliance and improving usability across devices.	

TRAINING & CERTIFICATIONS

- Undergoing **Full Stack MERN Development** training (MongoDB, Express, React, Node.js) via **RCPL Group**, Allenhouse Institute of Technology.
- AI for Data Analysis** – Google (Mar 2026); **Python for Data Science, AI & Development** – IBM (Mar 2026).
- Technology Job Simulation** – Deloitte Australia (Jun 2026); **Data Analytics Job Simulation** – Deloitte Australia (Jun 2026).
